All washing includes: Pre treatment for stains; pre-wash; 2 washes; 3 rinses; high spin moisture retraction; stretch to shape and air dried on custom blanket racks. Velcro cleaned, blanket checked thoroughly for tears, missing parts, and if applicable tested for water resistance. We use state-of-the-art commercial laundry equipment and eco friendly laundry products.

Note: Excessive hair or mud caked on blankets will require additional washing and will be charged accordingly. ALL items needing repair will be washed, and billed for washing. Call or email for pick up:

Blankets are an important part of your equipment. Regular maintenance is necessary for the safety and long life of your blankets. It is important to wash blankets regularly, and store properly when not in use.

Waterproofing lasts through many washings but acid in urine, manure, grit and sun exposure will destroy fabric and stitching. When manure gets caked on the back end of a blanket and leg straps, it often cannot be completely cleaned.

It is important to repair tears and fix loose straps and buckles as soon as possible. Small tears soon become big tears and buckles and straps get lost. Loose items are dangerous. Winter is just around the corner, and what better time to get repairs done before the snow flies. Get your blankets washed, repaired and ready to use when needed. There is nothing worse than needing a blanket and finding that it was put away dirty, missing parts and can't be used right away!

We use state-of-the-art commercial equipment to wash and repair your sheets and blankets. Blankets are pre washed, washed without agitation, rinsed 3 times, and spun at a high rate to remove excess moisture, and finally air dried in order to maintain the integrity and shape of the blanket. Pick up and delivery available.

Call Megan for more information or to schedule a pick up at your barn.

FREE Local Pick Up & Delivery Available
